join the corresponding semester in the revised scheme of instructions / regulations.

* Follow the specific Guidelines for Assignment / Seminar / Project work (dissertation report / viva) for awarding marks or grades to the student at the end of course of study / semester.

GUIDE LINES FOR ASSIGNMENT, SEMINAR AND PROJECT

The assignment, seminar and project work should be given due importance in curricula so as to contribute significantly in developing the careers of students. These enable the student to acquire knowledge, skills and competency required to holistic understanding of the field of discipline from which they have to be graduated.

ASSIGNMENT:

Normally assignment provides an opportunity for students to get acquainted with the innovative topics and emerging areas of interest in the field of their discipline of study.

The assignment should mainly focus on the following:

Clarity of Fundamental Concepts (Knowledge of Principles and Ideas)

Collection of Information (Relevant Significance for Now and Future)

Organization (Sequencing of Information)

Conciseness (Effectiveness in Easy to Follow)

Presenting facts (Illustration of Content in Context to Facilitate Learning)

Understanding of Principles

Interpretations (Draw Conclusions through Critical Thinking);

The theory-oriented assignments must be a minimum of 2000 words and a maximum of 5000 words depending upon the chosen topic and also not exceeding 20 pages.

Main Elements of Evaluation of Theory Assignment:

1. Title: 2%
2. Author's Name and Address 2%
3. Table of Contents 2%
4. Nomenclature 2%
5. Abstract or Summary 10%
6. Introduction and Aim 2%
7. Present Method 5%
8. Comment of Present Method 2%
9. Proposed Method 5%
10. Review of Earlier Work 5%
11. Description of experimental or theoretical work 5%
12. Discussion of experimental or theoretical work 5%
13. Conclusions 10%
14. Recommendations 5%
15. Suggested Future program 5%
16. Appendices 3%
17. Bibliography 5%
18. Tables and Illustrations (Graphs, Images etc.,) 5%
19. Other* 20%

* This includes interaction with faculty, meeting dead lines (regularity and punctuality), neatness and finished features of the submitting material in appropriate electronic form or written form.

At least three assignments have to be provided in which two of them to be Seminars

The students would enrich their knowledge by widening the scope for library use, internet use, computer use, collection of relevant data, analysis of available data, preparing a document and writing a report. This exercise would also facilitate developing thinking power, reasoning skills and effective writing ability. The Topics may be chosen from Abstracts, Proposals, Reports, Professional papers and journal articles or their course of study.

SEMINAR

The purpose of seminar is to develop self-confidence and communication skills among students so as to enable to achieve the following objectives

1. To encourage self-study by direct study of source material.
2. To develop critical analysis through proper reasoning
3. To train the students in oral presentation of technical reports
4. To promote co-operation and team spirit by intimate interaction between student and student and between student and faculty member.

The following suggestions may be adopted for successful implementation of seminar in accomplishing the said objectives.

1. The class of 24 / 60 may be divided into six groups with about 4 / 10 students in each group and a faculty member (teacher) is assigned to each group.
2. The topic for the seminar lecture to be delivered by student must be fixed in consultation with the student in the first week of the semester or any other convenient time, during which student should be able to pay at least 8 weeks of time to go through the survey of literature available in library and internet facilities and present a typed copy of the report in a prescribed format. If the report is not satisfactory, he should be asked to resubmit the report within another 2 or 4 weeks.
3. The teacher is allowed to go through the report for evaluation within a week and make necessary comments indicating the points of weakness of the report and necessary corrections may be incorporated or deleted before it is approved finally for presentation.
4. The satisfactory reports may be scheduled for presentation, giving at least one weeks notice to the students and faculty members of the department. An abstract of the seminar report may be circulated or exhibited in the notice board in advance so that the students are motivated and can intelligently to participate in the seminar.
5. The student should prepare himself to make power point presentation of seminar topic using the facilities of multimedia aided language lab. The seminar room should have projection and

appropriate audio-visual equipments.

6. Time for presentation of seminar report should be intimated in advance so that the student can prepare accordingly, and should be 15-30 minutes. The student should allot an adequate time of 15 minutes for discussion after the seminar lecture.

A two/four member committee (An External Member can also be included) of the faculty may assess the student performance at the seminar on the following:

- (i) Written Report (50%)
- (ii) Contents in Visual Presentation (use of Animation and Others) (20%)
- (iii) Oral Presentation (Language Command and Sequential Order) (10%)
- (iv) Communication (Eye to Eye Contact and Body Language) (10%)
- (v) Participation in Seminar Discussion (10%)

PROJECT:

The Project Work usually assigned in most of the technical institutions is a design oriented project in order that students compile, synthesize and integrate the knowledge they acquired from different subjects of their undergraduate program. As the interests and career opportunities of the students vary considerably, particularly towards the end of the under graduate program a student may be permitted to take theoretical and / or experimental and / or design project with appropriate data for development of a product or process or optimization of new technique or tool or idea. He may also be given the choice to take the project work problem from any of the allied subjects of particular discipline of his branch of study, provided that the problem of the project is relevant for the application to appropriate industry of his specialization.

The Project Report should normally include the following chapters with details indicated (wherever possible) for the Problem to be investigated.

1. Introduction: Objectives, Hypothesis and Significance
2. Methodology: Materials, Design, and Tools to be Used
3. Results Discussion:
4. Conclusions:
5. References:

GRADE %

A >80

B 60 – 79

C 50 – 59

D 40 – 49

F FAIL

Only Grading will be accorded for the Project Evaluation (A/B/C/D/F) to Represents achievement as follows:

“A”-- Outstanding relative to the level necessary to meet course requirements. **Excellent**

“B”-- Significantly above the level necessary to meet course requirements. **Very Good**

“C”-- Meets the course requirements in every respect. **Good**

“D”-- Worthy of credit even though it fails to meet fully the course requirements. **Fair**

“F”-- Failure and signifies that the work was either (1) completed but at a level of achievement that is not worthy of credit or 2) was not completed and there was no agreement between the instructor / evaluator and the student that the student would be awarded a Grade. **Fail**

Academic dishonesty in any portion of the academic work for a course shall be grounds for awarding a grade of F for the entire course.
