

ONGOING RESEARCH PROJECT 2016-17

1. antiparkinsonian and locomotor activity of ocimum sanctum leaves.
2. Formulation and evaluation of GRDD microspheres on selected drugs.
3. Formulation and evaluation of antiviral drug encapsulated niosomes.
4. RP-HPLC method development & validation for the simultaneous quantitative estimation of spironolactone & hydrochlorthiazide combination in tablets.
5. Synthesis and biological evaluation of chalcon linked with 1,2,4-triazoles.
6. Fruit extract mediated green synthesis of silver nanoparticle.
7. Synthesis & biological evaluation of novel indolo tetra hydroquonoline.
8. Formulation and evaluation of anti-psoriatic activity of oil encapsulated liposome.
9. Preparation & evaluation of moisturizing and vanishing creams by using mucilage.
10. Formulation and evaluation of fast dissolving tablets of robinazole.
11. Preparation & evaluation of nasal formulation.
12. Evaluation of antimicrobial activity of polyherbal formulation.
